異型擴張網

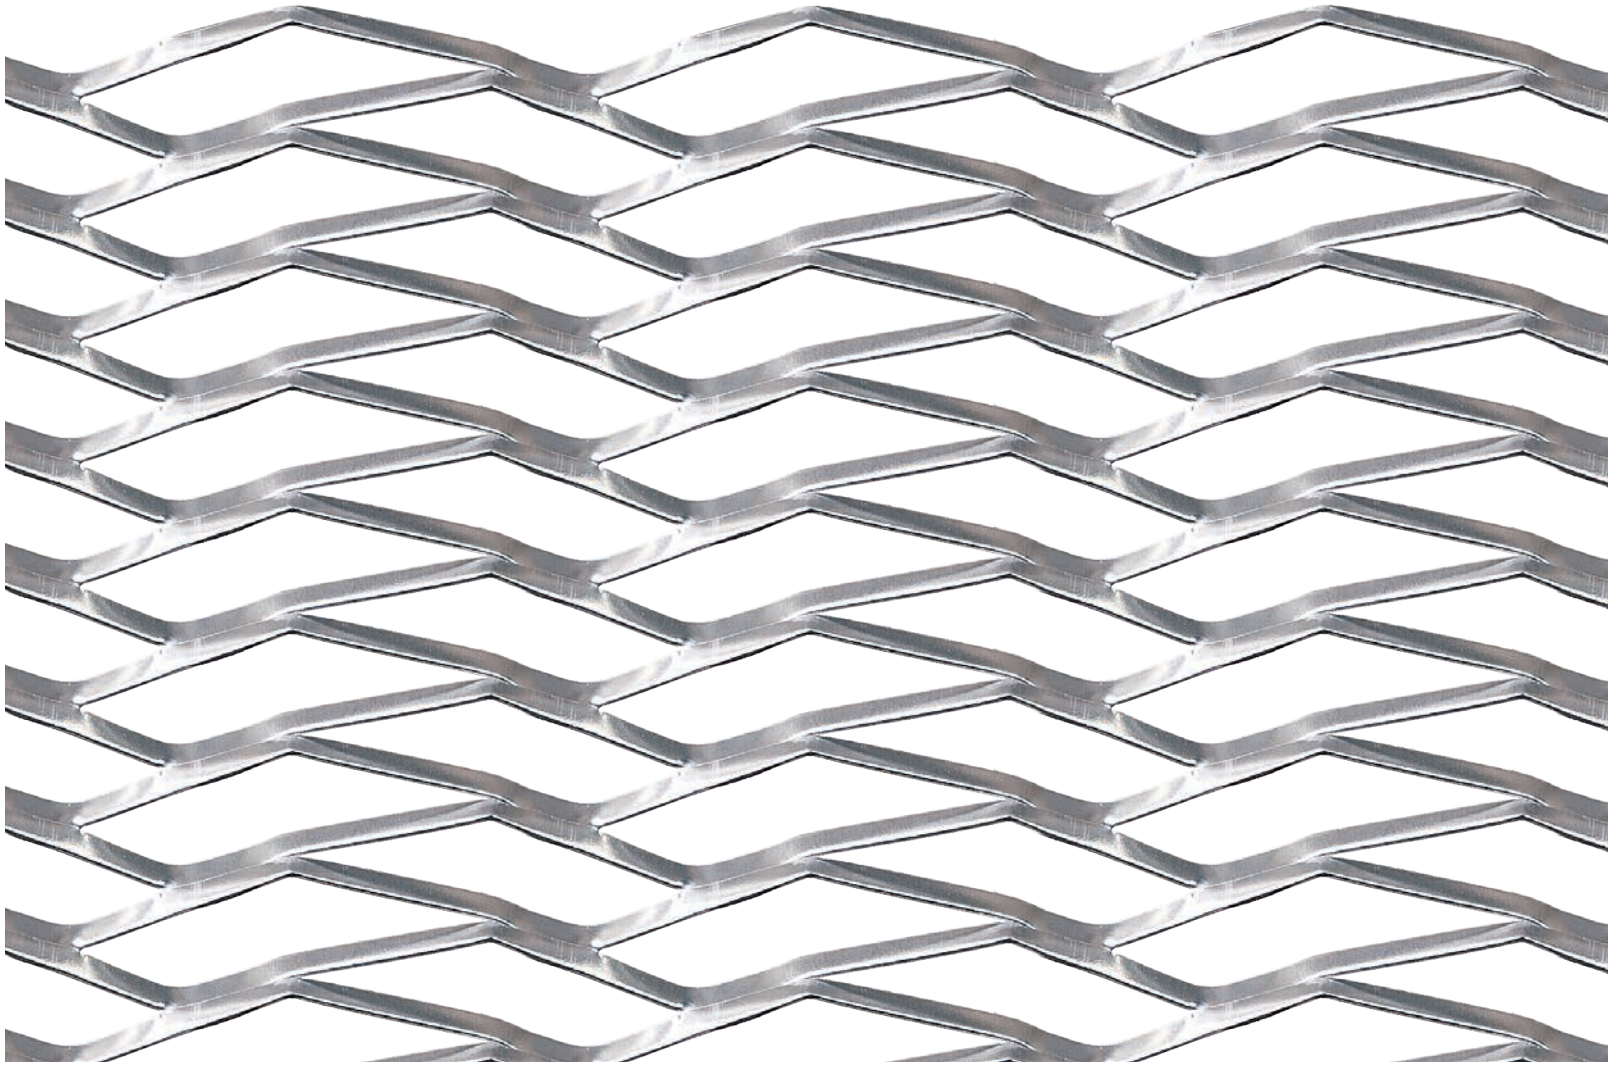

SKC Expanded Mesh

為了展現獨具一格的創意與巧思，上鎧鋼鐵並未拘泥於傳統的擴張網型，持續求新求變，不斷在推陳出新的時代浪潮中，踏穩業界無法取代的卓越地位，開發獨創異型孔，透過規律性的大小層遞，嚴謹計算過後的精準開孔，讓擴張網不單單具備原有的透光、散熱等功能性，更適用於特殊的裝潢需求，為建築設計提供首屈一指的優質選擇。異型擴張網正是集上鎧長年累積的技藝之大成，不論是大型公共工程亦或室內微裝修，都能以此作為畫龍點睛的精緻細節，提高整體建物的視覺層次，以低調手法呈現建物外觀的質感與特色，既能夠滿足設計師實現藍圖的創作空間，同樣為空間使用者帶來非凡體驗。

In order to show its unique creativity and ingenuity, Shang Kai Steel does not stick to the traditional expanded metal, but continues to seek innovation and change. The hole type, through the regular size layer delivery, the precise opening after rigorous calculation, makes the expansion net not only have the original functions such as light transmission and heat dissipation, but also suitable for special decoration needs, providing the first-class architectural design premium choice. The SKC expanded mesh is the culmination of the skills accumulated by Shang Kai over the years. Whether it is a large-scale public project or a small interior decoration, it can be used as the finishing touch to improve the visual level of the overall building, and present the building in a low-key manner. The texture and characteristics of the appearance can not only satisfy the designer's creative space for realizing the blueprint, but also bring extraordinary experience to the space users.
